

HTET WAI YAN OO

Computer Science Student | Data Analytics & Business Analysis Internship
Rangsit, Pathum Thani | 081 9692533 | myroncas@gmail.com | Burmese | Male

PROFILE

Final-year Computer Science student at Rangsit University focused on data analytics and business analysis. Hands-on experience using Excel, SQL/MySQL, Python/Pandas, and Power BI to clean data, analyze business trends, build dashboards, and communicate insights. Seeking a data or business analyst internship where I can support reporting, decision-making, and performance improvement.

EDUCATION

Rangsit University - Bachelor of Computer Science (Digital Innovation Technology)
Expected Graduation: 2027 | GPA: 3.70/4.00

TECHNICAL SKILLS

Analytics Tools: Excel (PivotTables, charts, dashboards), SQL/MySQL, Python/Pandas, Power BI, Jupyter Notebook
Data Analysis: Data cleaning, missing-value inspection, data type inspection, exploratory analysis, business insight generation
Reporting & Design: Dashboard design, visualization, presentation of findings, Microsoft Word, Canva
Relevant Coursework: Database Management Systems, Statistics, Data Structures, Algorithms, Business Analysis

PROJECT EXPERIENCE

Coffee Shop Sales Analysis

Tools: Excel, MySQL, Python/Pandas, Jupyter Notebook

- Cleaned and prepared coffee shop sales data for analysis using Excel and Python/Pandas.
- Used MySQL queries and Excel PivotTables to analyze revenue, product, store location, and hourly sales patterns.
- Created Excel dashboards and Python charts to communicate key sales insights for business decision-making.
- Organized the project with clear analysis files, dashboard screenshots, and a README for GitHub portfolio presentation.

Superstore Sales Analysis Dashboard

Tools: Power BI, Excel, Data Visualization

- Built an interactive Power BI dashboard to analyze sales, profit, category, segment, and regional performance.
- Designed filters and visuals to help compare business performance across products, categories, and locations.
- Identified top-performing areas and weaker profit patterns to support business-style recommendations.
- Practiced dashboard storytelling by turning raw sales data into clear and easy-to-understand business insights.

World Cup Data Analysis

Tools: Python, Pandas, Kaggle CSV

- Imported, explored, and cleaned a World Cup dataset from Kaggle using Python/Pandas.
- Checked missing values, data types, and prepared the dataset for analysis-ready exploration.
- Produced data-driven insights summarizing tournament patterns, team performance, and historical trends.

SOFT SKILLS

Communication	Problem Solving	Adaptability
Teamwork	Time Management	Attention to Detail

LANGUAGES

- Burmese (Native)
- English (Upper Intermediate)
- Thai (Basic)

INTERNSHIP FOCUS

Data Analyst Internship | Business Analysis Internship | Reporting & Dashboard Support

AVAILABILITY

Available for internship opportunities beginning August 2026 (4-5 months).
Open to data analytics, business analysis, reporting, and dashboard-related internship tasks.
